## Subject index

### *Alkali metals*

- Desorption and emission of potassium Rydberg atoms and clusters from iron oxide catalyst surfaces, C. Åman and L. Holmlid 62 (1992) 201
- High-temperature diffusion phenomena at the platinum/ $\text{Na}_{0.7}\text{WO}_3(001)$  interface. A study by X-ray photoelectron spectroscopy, G. Prelazzi, U. Bardi and A. Santucci 62 (1992) 277

### *Alloys*

- On the detection of elemental Li on Al–Li alloy surfaces using Auger electron spectroscopy, D.J. Bottomley, G. Lüpke, J. Bloch, H.M. van Driel and R.S. Timsit 62 (1992) 97

### *Aluminium*

- Characterization of Cu–Zn–Al oxide catalysts in the precipitated, calcined and reduced state by means of XPS with the help of a finger-print data base, B. Peplinski, W.E.S. Unger and I. Grohmann 62 (1992) 115
- Direct projection patterning of aluminum on the  $\text{SiO}_2$  surface by using synchrotron radiation induced growth initiation of thermal chemical vapor deposition, F. Uesugi and I. Nishiyama 62 (1992) 151
- A study of the composition and structure of chromate conversion coating on aluminum, Z. Yu, H. Ni, G. Zhang, Y. Wang, S. Dong and G. Zhao 62 (1992) 217

### *Aluminium oxide*

- Laser-induced prenucleation and/or metallization of alumina substrates by a new palladium resin, O. Dupuis, J.Ph. Soumillion and H. Sendrowicz 62 (1992) 269

### *Atomic force microscopy*

- Epitaxial growth of ultrathin films of bismuth: an atomic force microscopy study, J. Jing, P.N. Henriksen, H.T. Chu and H. Wang 62 (1992) 105
- A study of the morphology of photochromic and thermochromic  $\text{MoO}_3$  amorphous films using an atomic force microscope, F.A. Chudnovskii, D.M. Schaefer, A.I. Gavriluk and R. Reifenberger 62 (1992) 145

### *Auger electron spectroscopy*

- Ultrathin  $\text{CaF}_2$  layers on W(211), W. Dolinski, F. Golek, M. Kamaratos and E. Bauer 62 (1992) 1
- Interaction between plasma sprayed YBaCuO and nimonic substrates, W. Lisowski, H. Hemmes, D. Jäger, D. Stöver and A. van Silfhout 62 (1992) 13
- Metallurgical properties and characteristics of the Pd/Zn/Pd to p-type GaP ohmic contact interface layers, F. Zhang, Z. Song and J. Peng 62 (1992) 83
- On the detection of elemental Li on Al–Li alloy surfaces using Auger electron spectroscopy, D.J. Bottomley, G. Lüpke, J. Bloch, H.M. van Driel and R.S. Timsit 62 (1992) 97
- Direct projection patterning of aluminum on the  $\text{SiO}_2$  surface by using synchrotron radiation induced growth initiation of thermal chemical vapor deposition, F. Uesugi and I. Nishiyama 62 (1992) 151
- An analytical investigation of seal ring solder voiding on IC packages, W.R. Wade and J.H. Linn 62 (1992) 157
- The growth of zirconium oxide thin films on Au(111) single-crystal surfaces, J.R. Lou, U. Hess and K.A.R. Mitchell 62 (1992) 175
- Correlated scanning Auger and X-ray photoelectron spectroscopic investigations of silicon carbide powders, S.

- Contarini, E. Lambers and P.H. Holloway 62 (1992) 181
- Comment on 'Spectral noise removal by digital filtering and its application to surface analysis' by K. Piyakis and E. Sacher, M.P. Seah and P.J. Cumpson 62 (1992) 195
- Interface analysis of plasma-deposited titanium nitride on stainless steels, P. Gröning, S. Nowak, L. Schlapbach and H.E. Hintermann 62 (1992) 209
- A study of the composition and structure of chromate conversion coating on aluminum, Z. Yu, H. Ni, G. Zhang, Y. Wang, S. Dong and G. Zhao 62 (1992) 217
- XPS and AES studies of the interface reaction at the practical Pt/InP interface, D. Dai, H. Tang, G. Jiang, I. Davoli and S. Stizza 62 (1992) 249

### Barium

- Interaction between plasma sprayed YBaCuO and nimonic substrates, W. Lisowski, H. Hemmes, D. Jäger, D. Stöver and A. van Silfhout 62 (1992) 13

### Bismuth

- Epitaxial growth of ultrathin films of bismuth: an atomic force microscopy study, J. Jing, P.N. Henriksen, H.T. Chu and H. Wang 62 (1992) 105

### Calcium fluoride

- Ultrathin CaF<sub>2</sub> layers on W(211), W. Dolinski, F. Golek, M. Kamaratos and E. Bauer 62 (1992) 1

### Carbon dioxide

- Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. III. Interpretation of chemical and catalytic oxidation reactions on some oxides, Y.P. Arnaud 62 (1992) 47

### Carbon monoxide

- Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of

- activity and selectivity. III. Interpretation of chemical and catalytic oxidation reactions on some oxides, Y.P. Arnaud 62 (1992) 47
- Correlation of CO<sup>+</sup> desorption energy with adsorbed CO structure on Rh(111), J.H. Craig, Jr. and D. Donlin 62 (1992) 287

### Catalysis

- Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. II. Experimental and theoretical bases, Y.P. Arnaud 62 (1992) 37
- Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. III. Interpretation of chemical and catalytic oxidation reactions on some oxides, Y.P. Arnaud 62 (1992) 47
- Characterization of Cu-Zn-Al oxide catalysts in the precipitated, calcined and reduced state by means of XPS with the help of a finger-print data base, B. Peplinski, W.E.S. Unger and I. Grohmann 62 (1992) 115
- Thermally induced surface and catalytic properties of M<sub>2</sub>O<sub>3</sub> type catalysts, J.M. Domínguez, A. Vázquez-Zavala and G. Martínez 62 (1992) 239

### Ceramics

- Laser-induced prenucleation and/or metallization of alumina substrates by a new palladium resin, O. Dupuis, J.Ph. Soumillion and H. Sendrowicz 62 (1992) 269

### Chemical vapour deposition

- Direct projection patterning of aluminum on the SiO<sub>2</sub> surface by using synchrotron radiation induced growth initiation of thermal chemical vapor deposition, F. Uesugi and I. Nishiyama 62 (1992) 151
- Oxidation of TaSi<sub>2</sub> thin films on polycrystalline tantalum, F. Ringeisen, M. Alaoui, D. Bolmont and J.J. Koulmann 62 (1992) 167

*Chromium*

- A study of the composition and structure of chromate conversion coating on aluminum, Z. Yu, H. Ni, G. Zhang, Y. Wang, S. Dong and G. Zhao 62 (1992) 217

*Computer simulations*

- Irreversible site filling on alloy surfaces, O.L.J. Gijzeman 62 (1992) 61

*Copper*

- Interaction between plasma sprayed YBaCuO and nimonic substrates, W. Lisowski, H. Hemmes, D. Jäger, D. Stöver and A. van Silfhout 62 (1992) 13
- Characterization of Cu-Zn-Al oxide catalysts in the precipitated, calcined and reduced state by means of XPS with the help of a finger-print data base, B. Peplinski, W.E.S. Unger and I. Grohmann 62 (1992) 115
- The growth of Zn and ZnO<sub>x</sub> on Cu(111), E.V. Thomsen, M. Christiansen and J. Onsgaard 62 (1992) 189
- Laser-induced prenucleation and/or metallization of alumina substrates by a new palladium resin, O. Dupuis, J.Ph. Soumillion and H. Sendrowicz 62 (1992) 269

*Diamond*

- Scanning tunneling microscopy of polished diamond surfaces, M. Couto, W.J.P. van Enkevort, B. Wichman and M. Seal 62 (1992) 263

*Diffusion*

- High-temperature diffusion phenomena at the platinum/Na<sub>0.7</sub>WO<sub>3</sub>(001) interface. A study by X-ray photoelectron spectroscopy, G. Prelazzi, U. Bardi and A. Santucci 62 (1992) 277

*Electrical properties*

- Metallurgical properties and characteristics of the Pd/Zn/Pd to p-type GaP ohmic contact interface layers, F. Zhang, Z. Song and J. Peng 62 (1992) 83

*Electron diffraction*

- Surface structure of Si(001) treated by hydrogen and argon electron cyclotron resonance plasmas, M. Diani, J.L. Bischoff, L. Kubler and D. Bolmont 62 (1992) 67
- Thermally induced surface and catalytic properties of M<sub>0</sub>O<sub>3</sub> type catalysts, J.M. Domínguez, A. Vázquez-Zavala and G. Martínez 62 (1992) 239

*Electron microscopy*

- Metallurgical properties and characteristics of the Pd/Zn/Pd to p-type GaP ohmic contact interface layers, F. Zhang, Z. Song and J. Peng 62 (1992) 83
- Quantitative analysis of discontinuous silver films with XPS and TEM, J. Lörinčík 62 (1992) 89
- An analytical investigation of seal ring solder voiding on IC packages, W.R. Wade and J.H. Linn 62 (1992) 157
- Interface analysis of plasma-deposited titanium nitride on stainless steels, P. Gröning, S. Nowak, L. Schlapbach and H.E. Hintermann 62 (1992) 209
- Thermally induced surface and catalytic properties of M<sub>0</sub>O<sub>3</sub> type catalysts, J.M. Domínguez, A. Vázquez-Zavala and G. Martínez 62 (1992) 239
- Laser-induced prenucleation and/or metallization of alumina substrates by a new palladium resin, O. Dupuis, J.Ph. Soumillion and H. Sendrowicz 62 (1992) 269

*Electron stimulated desorption*

- Ultrathin CaF<sub>2</sub> layers on W(211), W. Dolinski, F. Golek, M. Kamaratos and E. Bauer 62 (1992) 1
- Correlation of CO<sup>+</sup> desorption energy with adsorbed CO structure on Rh(111), J.H. Craig, Jr. and D. Donlin 62 (1992) 287

*Epitaxy*

- Epitaxial growth of ultrathin films of bismuth: an atomic force microscopy study, J. Jing, P.N. Henriksen, H.T. Chu and H. Wang 62 (1992) 105

The growth of zirconium oxide thin films on Au(111) single-crystal surfaces, J.R. Lou, U. Hess and K.A.R. Mitchell

62 (1992) 175

### *Etching*

Surface structure of Si(001) treated by hydrogen and argon electron cyclotron resonance plasmas, M. Diani, J.L. Bischoff, L. Kubler and D. Bolmont

62 (1992) 67

### *Evaporation*

Epitaxial growth of ultrathin films of bismuth: an atomic force microscopy study, J. Jing, P.N. Henriksen, H.T. Chu and H. Wang

62 (1992) 105

The growth of Zn and ZnO<sub>x</sub> on Cu(111), E.V. Thomsen, M. Christiansen and J. Onsgaard

62 (1992) 189

### *Gallium phosphide*

Metallurgical properties and characteristics of the Pd/Zn/Pd to p-type GaP ohmic contact interface layers, F. Zhang, Z. Song and J. Peng

62 (1992) 83

### *Gold*

Atomic hydrogen solubility in thin gold films and its influence on hydrogen thermal desorption spectra from the surface, L. Stobiński and R. Duś

62 (1992) 77

The growth of zirconium oxide thin films on Au(111) single-crystal surfaces, J.R. Lou, U. Hess and K.A.R. Mitchell

62 (1992) 175

The laser ablation of gold films at the electrode surface of a quartz crystal microbalance, J. Pérez and B.R. Weiner

62 (1992) 281

### *Hydrogen*

Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. III. Interpretation of chemical and catalytic oxidation reactions on some oxides, Y.P. Arnaud

62 (1992) 47

Atomic hydrogen solubility in thin gold films and its influence on hydrogen thermal desorption spectra from the surface, L. Stobiński and R. Duś

62 (1992) 77

The role of hydrogen in the development of electronic interactions in Ni-titanium oxide systems, J.P. Espinós, A.R. González-Elipe and G. Munuera

62 (1992) 137

### *Indium phosphide*

XPS and AES studies of the interface reaction at the practical Pt/InP interface, D. Dai, H. Tang, G. Jiang, I. Davoli and S. Stizza

62 (1992) 249

### *Infrared spectroscopy*

A study of the composition and structure of chromate conversion coating on aluminum, Z. Yu, H. Ni, G. Zhang, Y. Wang, S. Dong and G. Zhao

62 (1992) 217

### *Interfaces*

Interface analysis of plasma-deposited titanium nitride on stainless steels, P. Gröning, S. Nowak, L. Schlapbach and H.E. Hintermann

62 (1992) 209

High-temperature diffusion phenomena at the platinum/Na<sub>0.7</sub>WO<sub>3</sub>(001) interface. A study by X-ray photoelectron spectroscopy, G. Prelazzi, U. Bardi and A. Santucci

62 (1992) 277

### *Ion scattering*

A study of the composition and structure of chromate conversion coating on aluminum, Z. Yu, H. Ni, G. Zhang, Y. Wang, S. Dong and G. Zhao

62 (1992) 217

### *Iron*

Irreversible site filling on alloy surfaces, O.L.J. Gijzeman

62 (1992) 61

### *Iron oxide*

Desorption and emission of potassium Rydberg atoms and clusters from iron oxide catalyst surfaces, C. Åman and L. Holmlid

62 (1992) 201

*Laser processing*

- Laser-induced prenucleation and/or metallization of alumina substrates by a new palladium resin, O. Dupuis, J.Ph. Soumillion and H. Sendrowicz 62 (1992) 269
- The laser ablation of gold films at the electrode surface of a quartz crystal microbalance, J. Pérez and B.R. Weiner 62 (1992) 281

*Low energy electron diffraction*

- Ultrathin  $\text{CaF}_2$  layers on W(211), W. Dolinski, F. Golek, M. Kamaratos and E. Bauer 62 (1992) 1
- Surface structure of Si(001) treated by hydrogen and argon electron cyclotron resonance plasmas, M. Diani, J.L. Bischoff, L. Kubler and D. Bolmont 62 (1992) 67
- The growth of zirconium oxide thin films on Au(111) single-crystal surfaces, J.R. Lou, U. Hess and K.A.R. Mitchell 62 (1992) 175

*Magnesium oxide*

- The chemistry of organosilane/metal oxide interfaces: reaction of trimethoxysilane on MgO and  $\text{SiO}_2$  surfaces, J.B. Danner and J.M. Vohs 62 (1992) 255

*Molybdenum oxide*

- A study of the morphology of photochromic and thermochromic  $\text{MoO}_3$  amorphous films using an atomic force microscope, F.A. Chudnovskii, D.M. Schaefer, A.I. Gavriluk and R. Reifenberger 62 (1992) 145
- Thermally induced surface and catalytic properties of  $\text{M}_2\text{O}_3$  type catalysts, J.M. Domínguez, A. Vázquez-Zavala and G. Martínez 62 (1992) 239

*Nickel*

- Interaction between plasma sprayed YBaCuO and nimonic substrates, W.

- Lisowski, H. Hemmes, D. Jäger, D. Stöver and A. van Silfhout 62 (1992) 13
- Irreversible site filling on alloy surfaces, O.L.J. Gijzeman 62 (1992) 61
- The role of hydrogen in the development of electronic interactions in Ni-titanium oxide systems, J.P. Espinós, A.R. González-Elipe and G. Munuera 62 (1992) 137

*Nitrogen dioxide*

- Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. III. Interpretation of chemical and catalytic oxidation reactions on some oxides, Y.P. Arnaud 62 (1992) 47

*Oxidation*

- Oxidation of  $\text{TaSi}_2$  thin films on polycrystalline tantalum, F. Ringeisen, M. Alaoui, D. Bolmont and J.J. Koulmann 62 (1992) 167

*Oxides*

- Interaction between plasma sprayed YBaCuO and nimonic substrates, W. Lisowski, H. Hemmes, D. Jäger, D. Stöver and A. van Silfhout 62 (1992) 13
- Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. I. Interpretation of oxygen thermal desorption spectra, Y.P. Arnaud 62 (1992) 21
- Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. II. Experimental and theoretical bases, Y.P. Arnaud 62 (1992) 37
- Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. III. Interpretation of chemical and catalytic oxidation reactions on some oxides, Y.P. Arnaud 62 (1992) 47

- Characterization of Cu-Zn-Al oxide catalysts in the precipitated, calcined and reduced state by means of XPS with the help of a finger-print data base, B. Peplinski, W.E.S. Unger and I. Grohmann 62 (1992) 115
- The growth of Zn and ZnO<sub>x</sub> on Cu(111), E.V. Thomsen, M. Christiansen and J. Onsgaard 62 (1992) 189

### Oxygen

- Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. I. Interpretation of oxygen thermal desorption spectra, Y.P. Arnaud 62 (1992) 21
- Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. II. Experimental and theoretical bases, Y.P. Arnaud 62 (1992) 37
- Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. III. Interpretation of chemical and catalytic oxidation reactions on some oxides, Y.P. Arnaud 62 (1992) 47
- The growth of zirconium oxide thin films on Au(111) single-crystal surfaces, J.R. Lou, U. Hess and K.A.R. Mitchell 62 (1992) 175

### Palladium

- Metallurgical properties and characteristics of the Pd/Zn/Pd to p-type GaP ohmic contact interface layers, F. Zhang, Z. Song and J. Peng 62 (1992) 83
- Laser-induced prenucleation and/or metallization of alumina substrates by a new palladium resin, O. Dupuis, J.Ph. Soumillion and H. Sendrowicz 62 (1992) 269

### Photoelectron spectroscopy

- Interaction between plasma sprayed YBaCuO and nimonic substrates, W. Lisowski, H. Hemmes, D. Jäger, D. Stöver and A. van Silfhout 62 (1992) 13

- Surface structure of Si(001) treated by hydrogen and argon electron cyclotron resonance plasmas, M. Diani, J.L. Bischoff, L. Kubler and D. Bolmont 62 (1992) 67
- Quantitative analysis of discontinuous silver films with XPS and TEM, J. Lörinčík 62 (1992) 89
- Characterization of Cu-Zn-Al oxide catalysts in the precipitated, calcined and reduced state by means of XPS with the help of a finger-print data base, B. Peplinski, W.E.S. Unger and I. Grohmann 62 (1992) 115
- The role of hydrogen in the development of electronic interactions in Ni-titanium oxide systems, J.P. Espinós, A.R. González-Elipé and G. Munuera 62 (1992) 137
- An analytical investigation of seal ring solder voiding on IC packages, W.R. Wade and J.H. Linn 62 (1992) 157
- Oxidation of TaSi<sub>2</sub> thin films on polycrystalline tantalum, F. Ringeisen, M. Alaoui, D. Bolmont and J.J. Koulmann 62 (1992) 167
- Correlated scanning Auger and X-ray photoelectron spectroscopic investigations of silicon carbide powders, S. Contarini, E. Lambers and P.H. Holloway 62 (1992) 181
- The growth of Zn and ZnO<sub>x</sub> on Cu(111), E.V. Thomsen, M. Christiansen and J. Onsgaard 62 (1992) 189
- Comment on 'Spectral noise removal by digital filtering and its application to surface analysis' by K. Piyakis and E. Sacher, M.P. Seah and P.J. Cumpson 62 (1992) 195
- Interface analysis of plasma-deposited titanium nitride on stainless steels, P. Gröning, S. Nowak, L. Schlapbach and H.E. Hintermann 62 (1992) 209
- A study of the composition and structure of chromate conversion coating on aluminum, Z. Yu, H. Ni, G. Zhang, Y. Wang, S. Dong and G. Zhao 62 (1992) 217
- XPS and AES studies of the interface reaction at the practical Pt/InP interface, D. Dai, H. Tang, G. Jiang, I. Davoli and S. Stizza 62 (1992) 249
- The chemistry of organosilane/metal oxide interfaces: reaction of trimethoxysilane on MgO and SiO<sub>2</sub> surfaces, J.B. Danner and J.M. Vohs 62 (1992) 255
- High-temperature diffusion phenomena at the platinum/Na<sub>0.7</sub>WO<sub>3</sub>(001) interface. A study by X-ray photoelectron spectroscopy, G. Prelazzi, U. Bardi and A. Santucci 62 (1992) 277

*Plasma processing*

- Surface structure of Si(001) treated by hydrogen and argon electron cyclotron resonance plasmas, M. Diani, J.L. Bischoff, L. Kubler and D. Bolmont 62 (1992) 67

*Platinum*

- XPS and AES studies of the interface reaction at the practical Pt/InP interface, D. Dai, H. Tang, G. Jiang, I. Davoli and S. Stizza 62 (1992) 249
- High-temperature diffusion phenomena at the platinum/ $\text{Na}_{0.7}\text{WO}_3(001)$  interface. A study by X-ray photoelectron spectroscopy, G. Prelazzi, U. Bardi and A. Santucci 62 (1992) 277

*Rhodium*

- Correlation of  $\text{CO}^+$  desorption energy with adsorbed CO structure on Rh(111), J.H. Craig, Jr. and D. Donlin 62 (1992) 287

*Secondary ion mass spectroscopy*

- Quantitative SIMS analysis based on the "combined LTE-bond breaking" model, Fan Chui-zhen, Jiang Neng and Qian Wei-jiang 62 (1992) 131
- Adsorption and decomposition of water on Si(100): a TPD and SSIMS study, X.-L. Zhou, C.R. Flores and J.M. White 62 (1992) 223

*Silicides*

- Oxidation of  $\text{TaSi}_2$  thin films on polycrystalline tantalum, F. Ringeisen, M. Alaoui, D. Bolmont and J.J. Koulmann 62 (1992) 167

*Silicon*

- Adsorption and decomposition of water on Si(100): a TPD and SSIMS study, X.-L. Zhou, C.R. Flores and J.M. White 62 (1992) 223

*Silicon carbide*

- Correlated scanning Auger and X-ray photoelectron spectroscopic investigations of silicon carbide powders, S. Contarini, E. Lambers and P.H. Holloway 62 (1992) 181

*Silicon oxide*

- Direct projection patterning of aluminum on the  $\text{SiO}_2$  surface by using synchrotron radiation induced growth initiation of thermal chemical vapor deposition, F. Uesugi and I. Nishiyama 62 (1992) 151
- The chemistry of organosilane/metal oxide interfaces: reaction of trimethoxysilane on MgO and  $\text{SiO}_2$  surfaces, J.B. Danner and J.M. Vohs 62 (1992) 255

*Silver*

- Quantitative analysis of discontinuous silver films with XPS and TEM, J. Lörinčík 62 (1992) 89

*Steel*

- Interface analysis of plasma-deposited titanium nitride on stainless steels, P. Gröning, S. Nowak, L. Schlapbach and H.E. Hintermann 62 (1992) 209

*Tantalum*

- Oxidation of  $\text{TaSi}_2$  thin films on polycrystalline tantalum, F. Ringeisen, M. Alaoui, D. Bolmont and J.J. Koulmann 62 (1992) 167

*Thermal desorption*

- Ultrathin  $\text{CaF}_2$  layers on W(211), W. Dolinski, F. Golek, M. Kamaratos and E. Bauer 62 (1992) 1
- Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. I. Interpretation of oxygen thermal desorption spectra, Y.P. Arnaud 62 (1992) 21

- Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. II. Experimental and theoretical bases, Y.P. Arnaud 62 (1992) 37
- Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. III. Interpretation of chemical and catalytic oxidation reactions on some oxides, Y.P. Arnaud 62 (1992) 47
- Atomic hydrogen solubility in thin gold films and its influence on hydrogen thermal desorption spectra from the surface, L. Stobiński and R. Duś 62 (1992) 77
- The growth of Zn and ZnO<sub>x</sub> on Cu(111), E.V. Thomsen, M. Christiansen and J. Onsgaard 62 (1992) 189
- Adsorption and decomposition of water on Si(100): a TPD and SSIMS study, X.-L. Zhou, C.R. Flores and J.M. White 62 (1992) 223
- Correlation of CO<sup>+</sup> desorption energy with adsorbed CO structure on Rh(111), J.H. Craig, Jr. and D. Donlin 62 (1992) 287
- Thin films*
- Ultrathin CaF<sub>2</sub> layers on W(211), W. Dolinski, F. Golek, M. Kamaratos and E. Bauer 62 (1992) 1
- Interaction between plasma sprayed YBaCuO and nimonic substrates, W. Lisowski, H. Hemmes, D. Jäger, D. Stöver and A. van Silfhout 62 (1992) 13
- Atomic hydrogen solubility in thin gold films and its influence on hydrogen thermal desorption spectra from the surface, L. Stobiński and R. Duś 62 (1992) 77
- Epitaxial growth of ultrathin films of bismuth: an atomic force microscopy study, J. Jing, P.N. Henriksen, H.T. Chu and H. Wang 62 (1992) 105
- A study of the morphology of photochromic and thermochromic MoO<sub>3</sub> amorphous films using an atomic force microscope, F.A. Chudnovskii, D.M. Schaefer, A.I. Gavrilyuk and R. Reifenger 62 (1992) 145
- The growth of zirconium oxide thin films on Au(111) single-crystal surfaces, J.R. Lou, U. Hess and K.A.R. Mitchell 62 (1992) 175
- Interface analysis of plasma-deposited titanium nitride on stainless steels, P. Gröning, S. Nowak, L. Schlapbach and H.E. Hintermann 62 (1992) 209
- A study of the composition and structure of chromate conversion coating on aluminum, Z. Yu, H. Ni, G. Zhang, Y. Wang, S. Dong and G. Zhao 62 (1992) 217
- Laser-induced prenucleation and/or metallization of alumina substrates by a new palladium resin, O. Dupuis, J.Ph. Soumillion and H. Sendrowicz 62 (1992) 269
- The laser ablation of gold films at the electrode surface of a quartz crystal microbalance, J. Pérez and B.R. Weiner 62 (1992) 281
- Titanium nitride*
- Interface analysis of plasma-deposited titanium nitride on stainless steels, P. Gröning, S. Nowak, L. Schlapbach and H.E. Hintermann 62 (1992) 209
- Titanium oxide*
- The role of hydrogen in the development of electronic interactions in Ni-titanium oxide systems, J.P. Espinós, A.R. González-Elipe and G. Munuera 62 (1992) 137
- Tungsten*
- Ultrathin CaF<sub>2</sub> layers on W(211), W. Dolinski, F. Golek, M. Kamaratos and E. Bauer 62 (1992) 1
- Tungsten oxide*
- High-temperature diffusion phenomena at the platinum/Na<sub>0.7</sub>WO<sub>3</sub>(001) interface. A study by X-ray photoelectron spectroscopy, G. Prelazzi, U. Bardi and A. Santucci 62 (1992) 277
- Tunneling*
- Scanning tunneling microscopy of polished diamond surfaces, M. Couto, W.J.P. van Enckevort, B. Wichman and M. Seal 62 (1992) 263

*Water*

Surface coordination number and surface redox couples on catalyst oxides, a new approach of the interpretation of activity and selectivity. III. Interpretation of chemical and catalytic oxidation reactions on some oxides, Y.P. Arnaud

62 (1992) 47

Adsorption and decomposition of water on Si(100): a TPD and SSIMS study, X.-L. Zhou, C.R. Flores and J.M. White

62 (1992) 223

*Work function*

Ultrathin  $\text{CaF}_2$  layers on W(211), W. Dolinski, F. Golek, M. Kamaratos and E. Bauer

62 (1992) 1

*X-ray diffraction*

Metallurgical properties and characteristics of the Pd/Zn/Pd to p-type GaP ohmic contact interface layers, F. Zhang, Z. Song and J. Peng

62 (1992) 83

A study of the composition and structure of chromate conversion coating on aluminum, Z. Yu, H. Ni, G. Zhang, Y. Wang, S. Dong and G. Zhao

62 (1992) 217

*Yttrium*

Interaction between plasma sprayed YBaCuO and nimonic substrates, W. Lisowski, H. Hemmes, D. Jäger, D. Stöver and A. van Silfhout

62 (1992) 13

*Zinc*

Metallurgical properties and characteristics of the Pd/Zn/Pd to p-type GaP ohmic contact interface layers, F. Zhang, Z. Song and J. Peng

62 (1992) 83

Characterization of Cu-Zn-Al oxide catalysts in the precipitated, calcined and reduced state by means of XPS with the help of a finger-print data base, B. Peplinski, W.E.S. Unger and I. Grohmann

62 (1992) 115

The growth of Zn and  $\text{ZnO}_x$  on Cu(111), E.V. Thomsen, M. Christiansen and J. Onsgaard

62 (1992) 189

*Zirconium*

The growth of zirconium oxide thin films on Au(111) single-crystal surfaces, J.R. Lou, U. Hess and K.A.R. Mitchell

62 (1992) 175
